ACTIVATED H₂O™ IS THE SAFEST WATER HEATING DEVICE

Your safety is our top priority. Carefully designed thermostant and sensor control prevent water from over heating, anti scalding system prevent users from activating boiling water accidentally.

ACTIVATED H₂O™ HEATER

Temp and filter status
indicator

Activated H₂O™ presents its uniqueness and the aesthetics of living while providing your customized needs.

TASTE OF FRESHNESS

Alupower™ heating technology keeps sufficient oxygen in the water and ensure the water in your body stay balanced. Other than users' safety, we are also guarding the health of your drinking water.

Delimesca™ effectively removed contaminants and calcium, which makes water refreshing.

Anti-Bacteria

Reduce limescale

GUARDING THE QUALITY

Delimesca™ purify tap water, removes chlorine, contaminants and calcium. It also improves the taste of drinking water, extend the heater and the faucet's life cycle. Enjoying a glass of refreshing, perfectly filtered drinking water couldn't be easier with Activated H2O™ .

Design

A compact, stylish and top quality product matches your home or work environment

Instant Hot Water

" Alupower™ Heat Technology™" activates boiling water in 4 seconds

Eco-Friendly

As you only use precisely what you need, there is very little water and energy wastage, achieving a greener household

Space-saving

Free yourself from kettle cluster and liberate one more plug point with Activated H2O™

Safety

Our carefully designed safety mechanisms make it an accident-free boiling water tap

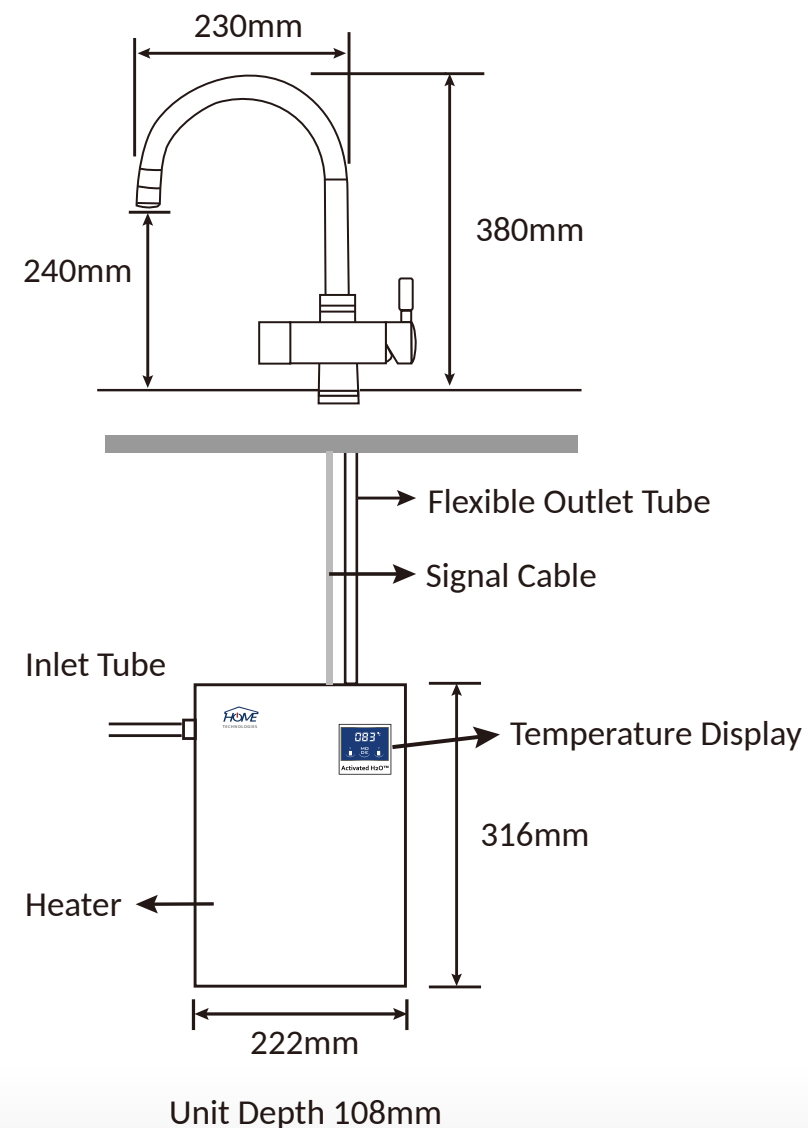

User Friendly

Enjoy boiling water at the touch of a button

TECHNICAL SPECIFICATIONS

Discription	Actiavted H2O
Heater Dimensions (H x W x D)	316mm x 222mm x 108mm
Heater Weight (g)	5.5 kg
Capacity (liters)	2.5L
Voltage (V)	220V, 50/60Hz
Wattage (W)	1400W
Stand-by power consumption (W)	17.6W
Initial Prep Time (mins)	11.5
Reheating Time 92°C to 98°C (min)	8.5
Recomm. Pressure (bar)	1.5-3.5
Safety Feature	Thermal protection circuit Anti-scalding mechanism
